

Adding documents to POA Documents

- Go to POA Documents page
- Use Elementor
- An option is to just copy the Text Editor container in Annual Meetings and add it to the Board Meetings. Another is to do this directly which I show below.
- I would recommend following the style in the Annual Meetings and simply list the ids for the docs vs a separate container that is in there now.

Pressing this + sign opens the elements in the left side. Here is Edit accordion. Look at next picture for elements.
